A-ZONE the simple solution for single area's while taking advantage of the benefits of underfloor heating

Comfort and Value: Warm water underfloor Heating works at lower temperatures than traditional types of heating. It operates more effectively by heating a larger surface area allowing the heat to transfer evenly. This makes underfloor heating a more efficient way of heating a property and provides savings on running costs, typically between 15 and 35 percent.

Design Freedom: Underfloor Heating gives the user more freedom to utilise valuable wall space traditionally taken up by radiators.

Ease of Use: Each system will come with a programmable room thermostat; this allows individual timing and control to the area.

Service: Customer service is top of the agenda at Underfloor Heating Now; customers receive free technical support from our qualified team of experts.

DELIVERY OF THE A-ZONE

A standard delivery time is normally within 2 working days. Saturday delivery is also available for a small additional cost.

For priority ordering of the A-ZONE system call 01202 894976
